

My name is Dianne Dinwiddie. I received my Associates Degree in Dietetic Technology from Portland Community College/Walla Walla University in 1982. Then, in 2012, I received my Bachelor's of Science in Human Development from Warner Pacific College.

I enjoy spending time with family and friends. I like to spend my free time painting, drawing, doing crafts, hiking and exploring the Oregon coast.

### **My Classroom Philosophy:**

Our classroom environment serves as a catalyst to help children learn problem solving and to recognize cause and effect through actions. Also, to help children develop independence and self-esteem through simple tasks.

### **Why I choose to work in Christian Education:**

Christian education positively impacted me throughout my childhood—giving me guidance and direction. My motivation, each day, is to provide our students with those same positive experiences I received.
